First of all, I love working with computers, helping people solve their problems with technology, and learning as much as I can. I recently have been shifting my career into software engineering and am currently almost finished with my software engineering accelerated “bootcamp” program at UNLV. I have been building web applications using the following programming languages/frameworks:

HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, SQL, GitHub/GitBash

I am experienced in Windows, Linux, and Mac Operating Systems and am currently in the process of learning Cyber Security. I can trouble shoot any type of problem and I enjoy figuring out solutions.

I am people-oriented, an analytical person, and open to challenges.

My previous experience in the food and beverage industry and my current education in software engineering, would make me a great asset for the county of Maui.
